

# Make your own 'Fortran Friends' Dodecahedral Calendar

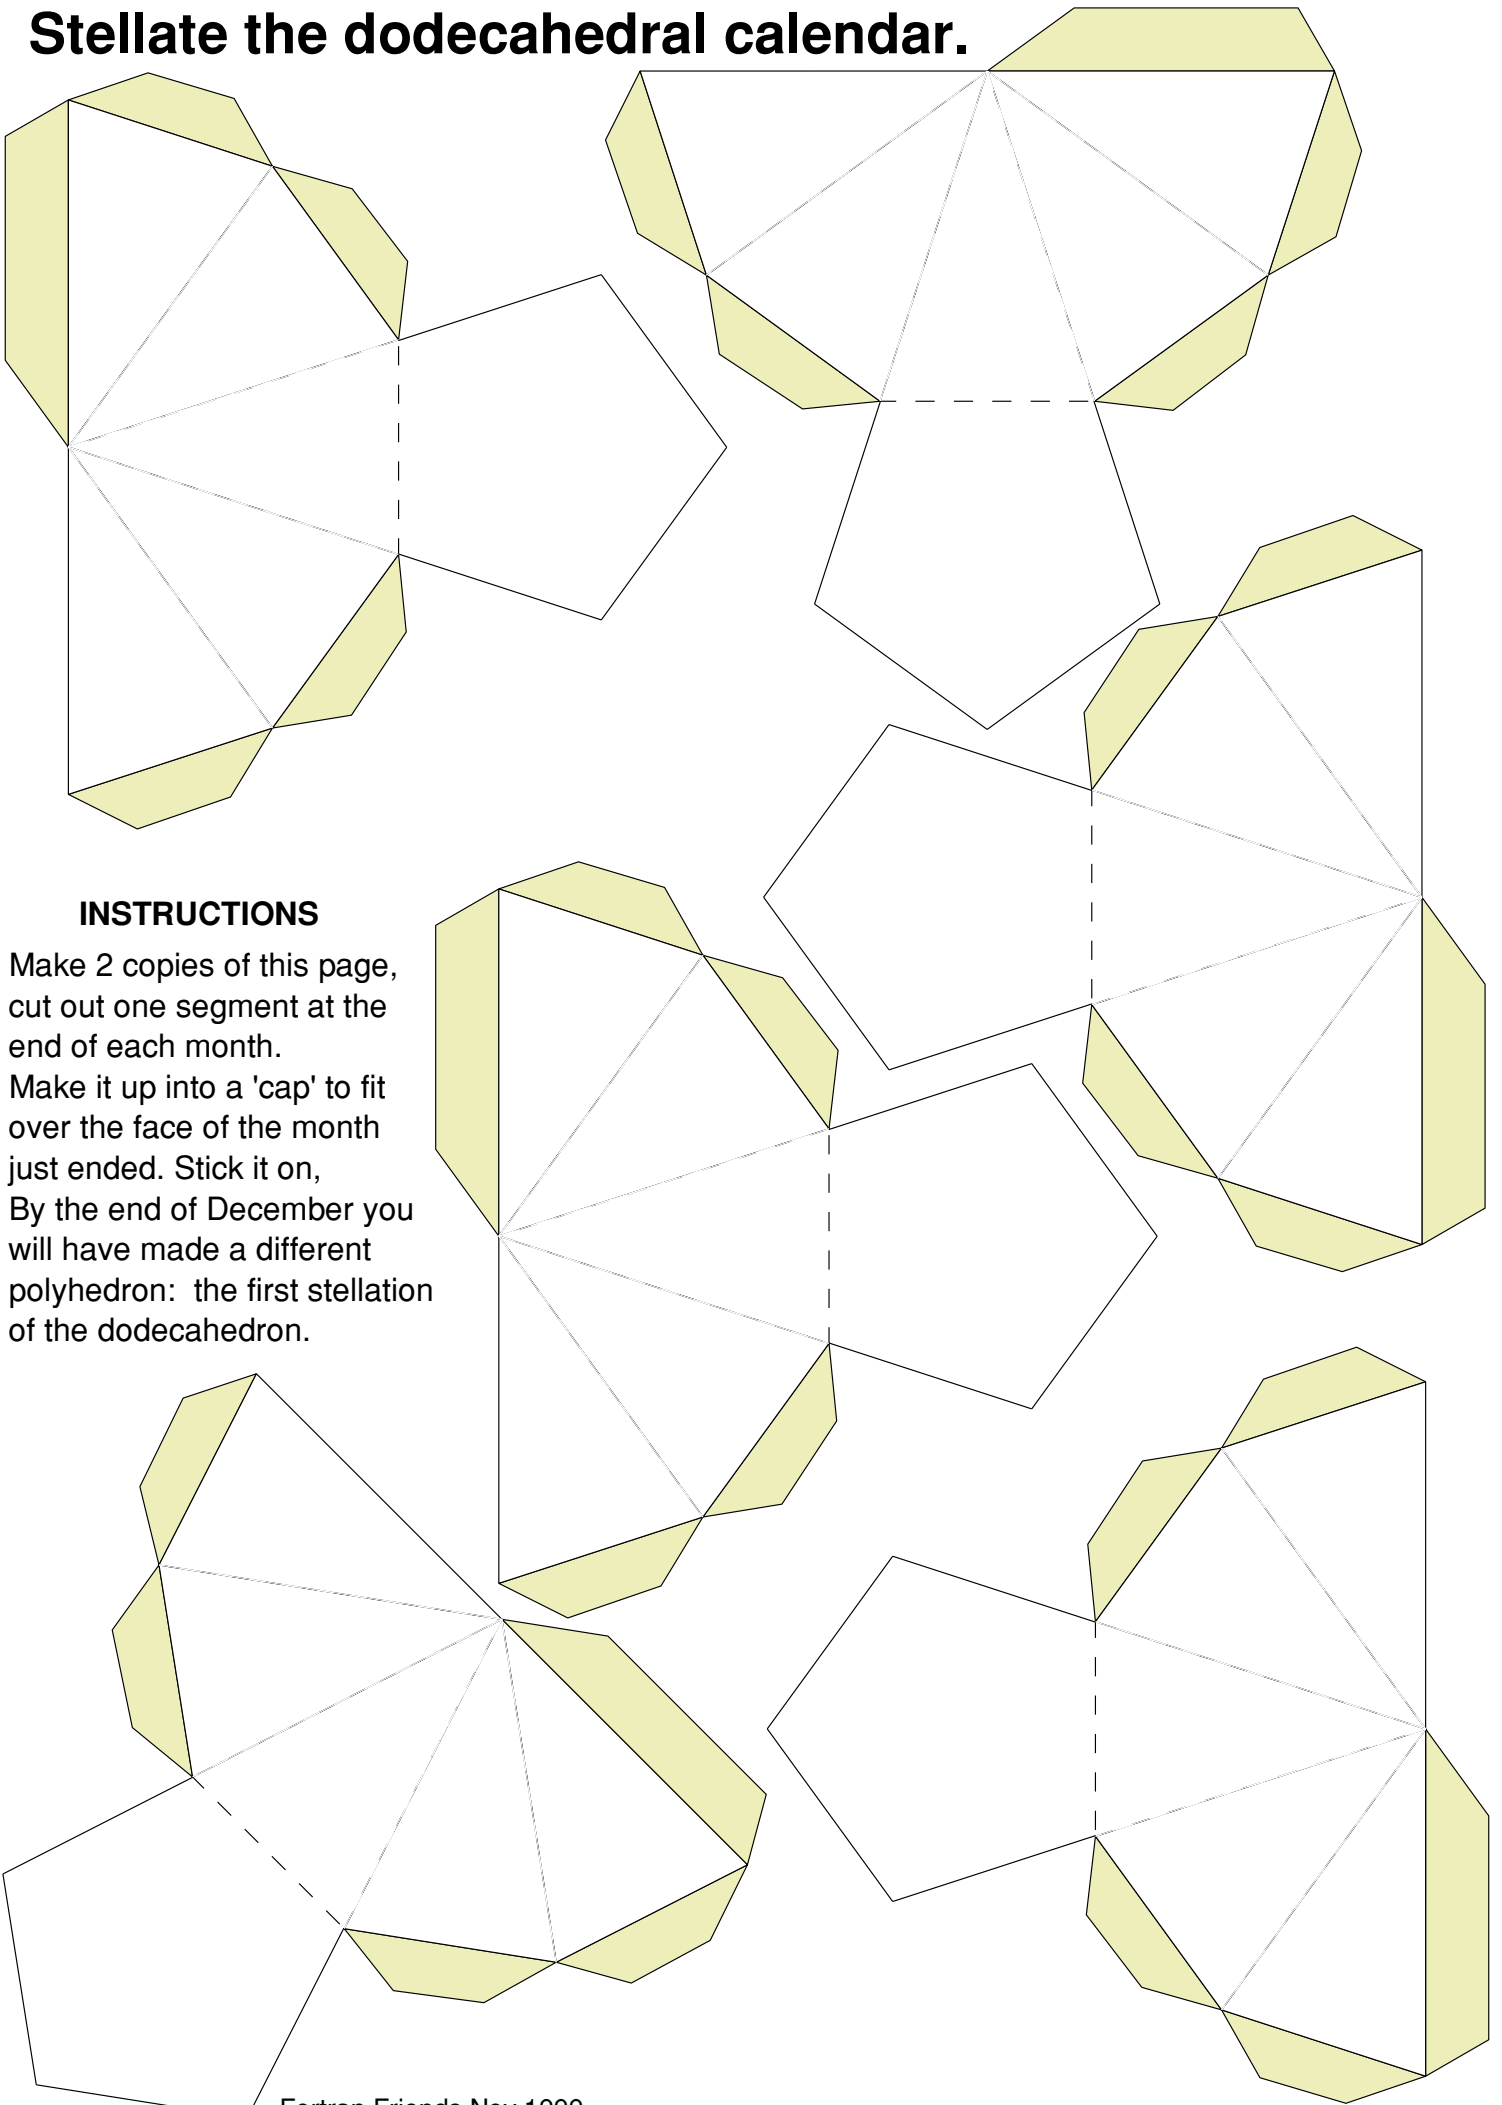

Cut this out to make yourself a dodecahedral calendar for 2024

Cut along solid line; fold along dotted lines.

Keep this card to remind you where we are.

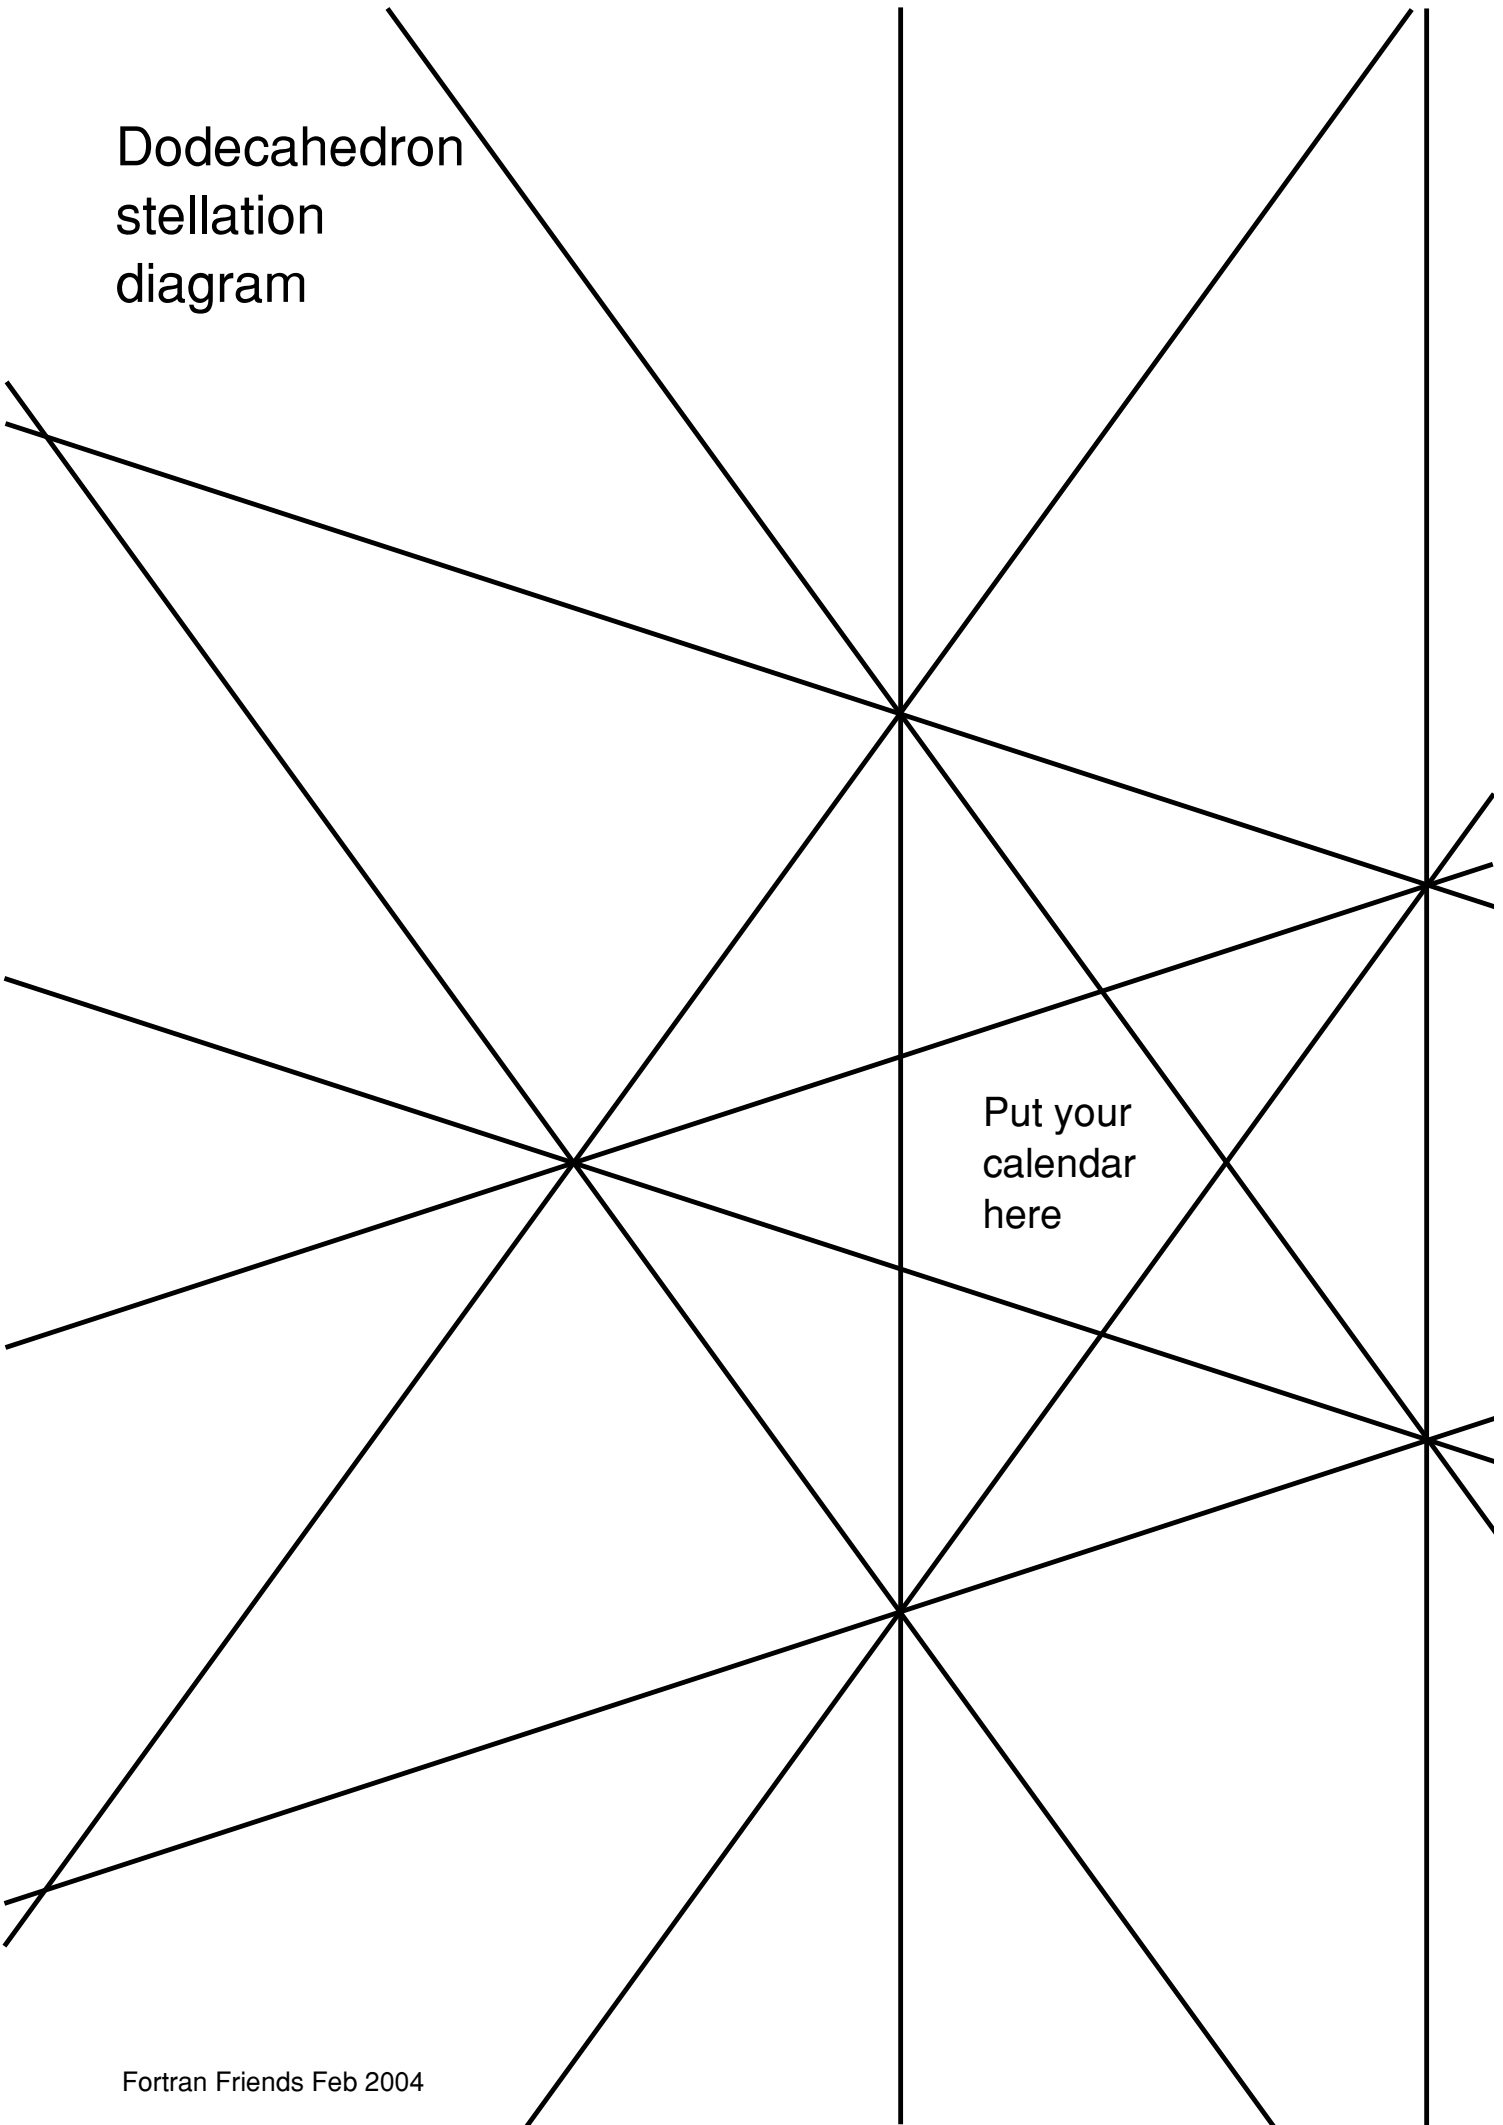

# Stellate the dodecahedral calendar.

## INSTRUCTIONS

Make 2 copies of this page, cut out one segment at the end of each month. Make it up into a 'cap' to fit over the face of the month just ended. Stick it on, By the end of December you will have made a different polyhedron: the first stellation of the dodecahedron.
